

PORTFOLIO 2026

Muhamad Rinjani Ramadan

INFORMATICS GRADUATE

Fresh graduate with hands-on experience in warehouse digitalization, software quality assurance, and manufacturing operations. I build digital tools that solve real operational problems.

GPA 3.38

TOEFL 550

BNSP Certified

Bekasi, Indonesia

Who I Am and What I Do

I graduated from **Universitas Bhayangkara Jakarta Raya** with a degree in Informatics (S.Kom.), carrying a GPA of 3.38/4.00 and a TOEFL ITP score of 550.

My professional experience spans warehouse digitalization, software quality assurance (blackbox testing, validation), IT troubleshooting, and hands-on manufacturing operations. I enjoy working at the intersection where technology directly improves day-to-day workflows.

I wrote my thesis on a **QR Code-based warehouse management system** using Reed-Solomon error correction and SHA-256 hashing, which I developed and tested at PT Globalnine Indonesia.

CERTIFICATIONS

Professional Experience

Intern, Warehouse Digitalization

PT Oneject Indonesia

Nov 2025 – May 2026

Contributed to warehouse digitalization by supporting system development, performing blackbox functional testing, running system validation, and writing technical documentation for the e-Docking Control System (e-DCS).

Digitalization

QA Testing

System Validation

Documentation

IT Support Intern

PT Globalnine Indonesia

Oct 2024 – Dec 2024

Provided hardware and software troubleshooting, user support, and maintained IT infrastructure in a corporate logistics environment.

IT Support

Troubleshooting

Infrastructure

Production Operator

PT Dharma Controlcable Indonesia

Aug 2022 – Apr 2023

Operated production lines in automotive control cable manufacturing, maintaining quality standards and supporting efficient output in a factory setting.

Manufacturing

Quality Control

Production

Admin & Warehouse Technician Intern

PT Globalnine Indonesia

Jan 2020 – Mar 2020

Handled warehouse administration, inventory tracking, and documentation in a logistics distribution environment.

e-Docking Control System (e-DCS)

Built during internship at PT Oneject Indonesia, Nov 2025 - May 2026

A web-based docking control system for warehouse loading and unloading queue management. Vehicles and cargo are tracked in real-time, allowing warehouse staff to see docking statuses without needing manual check-ins.

-  **Real-Time WebSocket Dashboard**
Live vehicle docking queues and statuses update automatically via WebSocket, no page reloads needed.
-  **Blackbox QA Testing**
Led functional testing and validation to verify system behavior against operational requirements before deployment.
-  **Technical Documentation**
Created detailed system docs covering test cases, user manuals, and validation reports.

System Overview

[Live System](#)

Built to bridge technology and warehouse floor operations, giving team members immediate visibility into logistics queues. My role focused on QA testing, validation, and documentation while supporting full-stack development.

Warehouse App + QR Code

Academic thesis at PT Globalnine Indonesia, 2024 - 2025

A web-based warehouse management app that uses QR Code labels for real-time inventory tracking. Each QR code is generated with Reed-Solomon error correction and validated through SHA-256 hashing to prevent tampering and cloning.

- **Reed-Solomon Error Correction**

Generates high-durability QR code labels that remain scannable even with partial damage or print defects.
- **SHA-256 Data Integrity**

Every scan is validated against a SHA-256 hash to confirm authenticity and prevent barcode cloning.
- **Inventory Tracking Dashboard**

Warehouse staff can view real-time stock levels, item locations, and transaction history through a clean web interface.

Scanning System

Thesis

This project reduced manual administration time and errors in cargo records at the warehouse. It was developed, tested, and validated as part of my undergraduate thesis at Universitas Bhayangkara Jakarta Raya.

- MySQL
- JavaScript
- Reed-Solomon
- SHA-256

Core Competencies

The skills I bring to the table, from coding to warehouse operations.

TECHNICAL

-  PHP & Laravel 11
-  JavaScript & React
-  HTML5, CSS, Tailwind
-  MySQL & PostgreSQL
-  Git Version Control
-  Python (Data Science)

QA & OPERATIONS

-  Blackbox Testing
-  UML & System Design
-  Technical Documentation
-  Process Optimization
-  Warehouse Digitalization
-  System Validation

PROFESSIONAL

-  Google Ads & GTM
-  MS Office Suite
-  Cross-Functional Teamwork
-  Research & Analysis
-  Bilingual (EN / ID)
-  Hardware Troubleshooting

Certifications & Credentials

11 professional certifications from BNSP, IBM, Cisco, Dicoding, and Coding Studio.

Software Engineer (BNSP)
Badan Nasional Sertifikasi Profesi
Issued Sep 2025, Expires Sep 2028
ID: 62090 2512 6 5765 2025

Data Science Intermediate
Coding Studio, Issued Jun 2024
ID: 75B59417D2-75B58413CE-75AF13CFF5

Python for Data Science
IBM, Issued Jan 2024
[View on Credly](#)

Code Generation & Optimization (IBM Granite)
IBM, Issued Aug 2025
[View on Credly](#)

Junior Cybersecurity Analyst
Cisco, Issued Jan 2024
[View on Credly](#)

Introduction to Cybersecurity
Cisco, Issued Oct 2023
[View on Credly](#)

JavaScript Essentials 1
Cisco, Issued Dec 2024
[View on Credly](#)

Plus 4 more from Dicoding Indonesia (AI, Front-End, JavaScript, Web Dev)
See all credentials on my portfolio →

Let's Connect

Open to roles in Software Engineering, Quality Assurance, IT Support, and Warehouse Operations. If you're looking for someone who can bridge tech and operations, let's talk.
