

PORTFOLIO SLIDE DECK

Muhamad Rinjani Ramadan

INFORMATICS GRADUATE

Optimizing physical operations through digital systems, specializing in warehouse digitalization, software quality control, and process engineering.

Swipe to continue →

Driving Efficiency Through Technology

I am an Informatics graduate with practical experience spanning **warehouse digitalization**, **software quality assurance**, and manufacturing operations.

I thrive at the intersection of technology and operations — solving real-world operational problems, streamlining workflows, and building digital tools that create tangible business value.

CREDENTIALS

My Professional Timeline

Intern – Warehouse Digitalization

PT Oneject Indonesia

Contributed to warehouse digitalization initiatives including system development, functional testing (blackbox), validation, and documentation for manufacturing operations.

Nov 2025 – May 2026

IT Support Intern

PT Globalnine Indonesia

Provided hardware/software troubleshooting, technical user support, and IT infrastructure maintenance in a corporate logistics environment.

Oct 2024 – Dec 2024

Production Operator

PT Dharma Controlcable Indonesia

Operated manufacturing production lines, ensuring high quality control standards in automotive control cable manufacturing.

Aug 2022 – Apr 2023

e-Docking Control System (e-DCS)

Warehouse Digitalization Internship @ PT Oneject Indonesia

A comprehensive docking control system designed to streamline warehouse loading and unloading queue management.

-  **Real-Time Monitoring**
WebSocket-based dashboard displays vehicle docking queues and statuses dynamically without reload.
-  **Comprehensive QA Testing**
Led functional testing (blackbox) and validation to ensure seamless operational integration.

Dashboard View

[Live System](#)

Designed to bridge technology and operational workflows on the warehouse floor, giving team members immediate visibility into logistics queues.

Laravel 11

PostgreSQL

React

WebSocket

TailwindCSS

Warehouse App + QR Code

Academic Thesis Project @ PT Globalnine Indonesia

An integrated web application designed to track and control inventory in real-time using secure QR Code labeling.

Custom QR Generation

Generates high-reliability QR code labels using Reed-Solomon error correction for high scanning durability.

SHA-256 Hashing

Ensures robust data integrity and validation for scanning inputs, preventing barcode cloning.

Scanning System

Thesis Project

Successfully mapped item tracking states and inventory levels, reducing manual administration times and errors in cargo records.

PHP

MySQL

JavaScript

Reed-Solomon

SHA-256

Core Competencies

TECHNICAL

-  PHP & Laravel 11
-  JavaScript & React
-  HTML5, CSS & Tailwind
-  MySQL & PostgreSQL
-  Git Version Control

OPERATIONAL & QA

-  Blackbox testing
-  UML & System Design
-  Technical Doc
-  Process Optimization
-  Warehouse Digitalization

PROFESSIONAL

-  Google Ads & GTM
-  MS Office Suite
-  Cross-Functional Work
-  Research & Analysis
-  Bilingual (EN/ID)

Professional Certifications

Software Engineer

BNSP • Issued Sep 2025
ID: 62090 2512 6 5765 2025

Data Science Intermediate

Coding Studio • Issued Jun 2024
ID: 75B59417D2-75B58413CE-75AF13CFF5

Python for Data Science

IBM • Issued Jan 2024

Code Gen & Optimization

IBM • Issued Aug 2025

🔑 Holds 7 additional professional credentials from Cisco & Dicoding Indonesia

Let's **Work Together**

Open to roles in Software Engineering, Quality Assurance, IT Support, or Warehouse Operations. Let's discuss how I can help streamline your digital systems.
